

The 2011 Import and Export Market for Agricultural and Horticultural Machinery for Soil Preparation or Cultivation, Lawn or Sports Ground Rollers, and Their Parts in Denmark

On the demand side, exporters and strategic planners focusing on agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts in Denmark face a number of questions. Which countries are supplying agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts to Denmark? How important is Denmark compared to others in terms of the entire global and regional market? How much do the imports of agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts vary from one country of origin to another in Denmark? On the supply side, Denmark also exports agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts. Which countries receive the most exports from Denmark? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts in Denmark. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for agricultural and horticultural machinery for soil preparation or cultivation, lawn or sports ground rollers, and their parts for those countries serving Denmark via exports, or supplying from Denmark via imports. It does so for the current year based on a variety of key

historical indicators and econometric models. In what
