

The 2011 Import and Export Market for Antiknock Preparations, Oxidation Inhibitors, Anticorrosive Preparations, and Other Prepared Additives for Mineral Oils Including Gasoline in Singapore

On the demand side, exporters and strategic planners focusing on antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils including gasoline in Singapore face a number of questions. Which countries are supplying antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils including gasoline to Singapore? How important is Singapore compared to others in terms of the entire global and regional market? How much do the imports of antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils including gasoline vary from one country of origin to another in Singapore? On the supply side, Singapore also exports antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils including gasoline. Which countries receive the most exports from Singapore? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils including gasoline in Singapore. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for antiknock preparations, oxidation inhibitors, anticorrosive preparations, and other prepared additives for mineral oils

including gasoline for those countries serving Singapore via exports, or supplying from Singapore via imports. It does so for the current year
