

The 2011 Import and Export Market for Woven Fabrics from High-Tenacity Nylon, Polyamide, or Polyester Yarn in South Korea

On the demand side, exporters and strategic planners focusing on woven fabrics from high-tenacity nylon, polyamide, or polyester yarn in South Korea face a number of questions. Which countries are supplying woven fabrics from high-tenacity nylon, polyamide, or polyester yarn to South Korea? How important is South Korea compared to others in terms of the entire global and regional market? How much do the imports of woven fabrics from high-tenacity nylon, polyamide, or polyester yarn vary from one country of origin to another in South Korea? On the supply side, South Korea also exports woven fabrics from high-tenacity nylon, polyamide, or polyester yarn. Which countries receive the most exports from South Korea? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for woven fabrics from high-tenacity nylon, polyamide, or polyester yarn in South Korea. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for woven fabrics from high-tenacity nylon, polyamide, or polyester yarn for those countries serving South Korea via exports, or supplying from South Korea via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where South Korea fits into the world market for imported and exported woven fabrics from high-tenacity nylon, polyamide, or polyester yarn. The

total level of imports and exports on a worldwide basis, and those for South Korea in particular, is estimated using
