

# The 2011 Import and Export Market for Portable Electric Lamps with Self-Contained Energy Sources Such As Dry Batteries, Storage Batteries, and Magnetos Excluding Lamps for Motor Vehicles in China

On the demand side, exporters and strategic planners focusing on portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles in China face a number of questions. Which countries are supplying portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles to China? How important is China compared to others in terms of the entire global and regional market? How much do the imports of portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles vary from one country of origin to another in China? On the supply side, China also exports portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles. Which countries receive the most exports from China? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles in China. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for portable electric lamps with self-contained energy sources such as dry batteries, storage batteries, and magnetos excluding lamps for motor vehicles for

those countries serving China via exports, or supplying from China via imports. It does so
