

# The 2011 Import and Export Market for Diodes, Transistors, and Similar Semiconductor Devices; Photosensitive Semiconductor Devices; and Light-Emitting Diodes in Switzerland

On the demand side, exporters and strategic planners focusing on diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes in Switzerland face a number of questions. Which countries are supplying diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes to Switzerland? How important is Switzerland compared to others in terms of the entire global and regional market? How much do the imports of diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes vary from one country of origin to another in Switzerland? On the supply side, Switzerland also exports diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes. Which countries receive the most exports from Switzerland? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes in Switzerland. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for diodes, transistors, and similar semiconductor devices; photosensitive semiconductor devices; and light-emitting diodes for those countries serving Switzerland via exports, or supplying from

Switzerland via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In
