

The 2009 Import and Export Market for Electric Motors with Output Exceeding 37.5 w and DC Generators in Singapore

On the demand side, exporters and strategic planners focusing on electric motors with output exceeding 37.5 w and dc generators in Singapore face a number of questions. Which countries are supplying electric motors with output exceeding 37.5 w and dc generators to Singapore? How important is Singapore compared to others in terms of the entire global and regional market? How much do the imports of electric motors with output exceeding 37.5 w and dc generators vary from one country of origin to another in Singapore? On the supply side, Singapore also exports electric motors with output exceeding 37.5 w and dc generators. Which countries receive the most exports from Singapore? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for electric motors with output exceeding 37.5 w and dc generators in Singapore. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for electric motors with output exceeding 37.5 w and dc generators for those countries serving Singapore via exports, or supplying from Singapore via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Singapore fits into the world market for imported and exported electric motors with output exceeding 37.5 w and dc generators. The total level of imports and exports on a worldwide basis, and those for Singapore

in particular, is estimated using a model which aggregates across over 150 key country markets and
