

IB Math Studies

The International Baccalaureate (IB) was founded in Geneva, Switzerland in 1968 as a non-profit educational foundation that endeavored to develop inquiring, knowledgeable and caring young people who would go on to create a better and more peaceful world through intercultural understanding and respect. What began as a single program for internationally mobile students preparing for college, has grown into a series of programs for students up to age 19. Barrons is pleased to offer a brand new review guide for the IB Mathematics Studies exam. The content of the book is based on the curriculum and covers all topics required for exams beginning in 2014
