

# The 2009 Import and Export Market for Mechano-Therapy Appliances, Massage Apparatus, and Psychological Aptitude-Testing Apparatus in Denmark

On the demand side, exporters and strategic planners focusing on mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus in Denmark face a number of questions. Which countries are supplying mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus to Denmark? How important is Denmark compared to others in terms of the entire global and regional market? How much do the imports of mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus vary from one country of origin to another in Denmark? On the supply side, Denmark also exports mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus. Which countries receive the most exports from Denmark? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus in Denmark. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus for those countries serving Denmark via exports, or supplying from Denmark via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by

summarizing where Denmark fits into the world market for imported and exported mechano-therapy appliances, massage apparatus, and psychological aptitude-testing apparatus.
