

The 2009 Import and Export Market for Boards, Panels, Consoles, Desk, Cabinets, and Bases for Electrical Controls without Their Electrical Apparatus in Italy

On the demand side, exporters and strategic planners focusing on boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus in Italy face a number of questions. Which countries are supplying boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus to Italy? How important is Italy compared to others in terms of the entire global and regional market? How much do the imports of boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus vary from one country of origin to another in Italy? On the supply side, Italy also exports boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus. Which countries receive the most exports from Italy? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus in Italy. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for boards, panels, consoles, desk, cabinets, and bases for electrical controls without their electrical apparatus for those countries serving Italy via exports, or supplying from Italy via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Italy fits into the world

market for imported and exported
