

# The 2016 Import and Export Market for Hot-Rolled Stainless Steel Flat-Rolled Products of At Least 600 mm Wide and 4.75 mm Thick in Coils in Japan

## The 2016 Import and Export Market for Hot-Rolled Stainless Steel Flat-Rolled Products of At Least 600 mm Wide and 4.75 mm Thick in Coils in Japan

by  
**Professor Philip M. Parker, Ph.D.**  
Chaired Professor of Management Science  
INSEAD (Singapore and Fontainebleau, France)

On the demand side, exporters and strategic planners focusing on hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils in Japan face a number of questions. Which countries are supplying hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils to Japan? How important is Japan compared to others in terms of the entire global and regional market? How much do the imports of hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils vary from one country of origin to another in Japan? On the supply side, Japan also exports hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils. Which countries receive the most exports from Japan? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils in Japan. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for hot-rolled stainless steel flat-rolled products of at least 600 mm wide and 4.75 mm thick in coils for those countries serving Japan via exports, or supplying from Japan via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Japan fits into the world market for imported and exported

hot-rolled stainless steel flat-rolled  
products of at least 600 mm wide
