

The End of the Universe

When the brilliant but troubled cosmologist Dr. Jack Martins built the worlds first spherical hologram, he created a 3 dimensional image that was so real, it astonished a panel of scientists, politicians, and media in Washington, D.C. Further research enabled him to prove the validity of the Holographic Principle, and to show that the reality of our 3 dimensional universe can be described on a two dimensional boundary. With his spherical holograms, Dr. martins demonstrated that the universe we see through our telescopes might not really exist -- that it might just be a very real, very sophisticated illusion! When NASA sent a deep space probe to the boundary calculated by Dr. Martins as the edge of the universe, it disappeared shortly after reaching Alpha Centauri, the closest star to Sol. Then, an astronomical event occurred that blew the minds of every single person on earth...
