

The 2011 Import and Export Market for Worked Aluminum and Aluminum Alloys in Slovenia

On the demand side, exporters and strategic planners focusing on worked aluminum and aluminum alloys in Slovenia face a number of questions. Which countries are supplying worked aluminum and aluminum alloys to Slovenia? How important is Slovenia compared to others in terms of the entire global and regional market? How much do the imports of worked aluminum and aluminum alloys vary from one country of origin to another in Slovenia? On the supply side, Slovenia also exports worked aluminum and aluminum alloys. Which countries receive the most exports from Slovenia? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for worked aluminum and aluminum alloys in Slovenia. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for worked aluminum and aluminum alloys for those countries serving Slovenia via exports, or supplying from Slovenia via imports. It does so for the current year based on a variety of key historical indicators and econometric models. In what follows, Chapter 2 begins by summarizing where Slovenia fits into the world market for imported and exported worked aluminum and aluminum alloys. The total level of imports and exports on a worldwide basis, and those for Slovenia in particular, is estimated using a model which aggregates across over 150 key country markets and projects these to the current year. From there, each country represents a percent of

the world market. This market is served from a number of competitive countries of origin. Based on both demand-
